

Borderless

The Fastest Cross-Chain
Bridge on Telegram

Whitepaper Version 1.0

Introduction

Breaking Chain Barriers

In the dynamic and rapidly evolving landscape of decentralized finance (DeFi), seamless interoperability between blockchain networks has become a fundamental necessity. Borderless Bridge is built to meet this demand—enabling users to transfer assets across chains instantly, securely, and directly within Telegram through the @BorderlessBridgeBot.

This document outlines the utility, mechanics, tokenomics, and roadmap of the Borderless Bridge ecosystem, with a focus on providing an intuitive, fast, and user-centric experience.

Mission Statement

Bridge Without Limits

To eliminate barriers in blockchain interoperability by delivering the fastest, most secure, and user-friendly cross-chain bridge—entirely powered via Telegram.

Key Features

Telegram Integration: Full functionality within Telegram—no browser or app switching.

Lightning-Fast Transactions: Transfers processed in seconds across supported chains.

Secure Infrastructure: Professional code and strong encryption safeguard user assets.

Intuitive UI: No technical knowledge required—bridge with a few clicks.

Low Fees: 0.5% transaction fee—significantly cheaper than many competitors.

Referral Rewards: Earn passively every time someone uses your referral link.

Ongoing Expansion: Rapid integration of new chains

Supported Networks

Chains We Support

- ✓ **ETH (ERC20)** – DeFi's flagship chain.
- ✓ **Base** – Layer 2 for scalability and reduced gas fees.
- ✓ **BNB (BEP20)** – Gateway to the Binance Smart Chain.
- ✓ **Upcoming** – **BTC** and **Solana** (launching tomorrow post whitepaper release).

Borderless Token (\$BDL)

Token Overview

Feature	Details
Name	Borderless
Symbol	BDL
Blockchain	Ethereum (ETH)
Launch Platform	Uniswap
Tax Structure	4% Buy / 4% Sell
Launch Date	July 14th, 2025 at 6:00 PM UTC

Utility

- ✔ Used for governance and incentivization.
- ✔ Receives buyback support from bridge revenue.
- ✔ Benefits from rising bridge usage through scarcity and value appreciation.

Revenue Model

Sustainable & Scalable Profits

Each bridge transaction incurs a **0.5% fee**, distributed as follows:

Allocation

Purpose

0.10%

Paid to the referrer

0.40%

Retained by the project and split evenly:

✓ 50% → BDL Token Buybacks (boost price floor and scarcity).

✓ 50% → Marketing (expand user base and adoption).

This cyclical model supports token holders while funding aggressive user acquisition campaigns.

Passive Income Opportunities

Earn While You Bridge

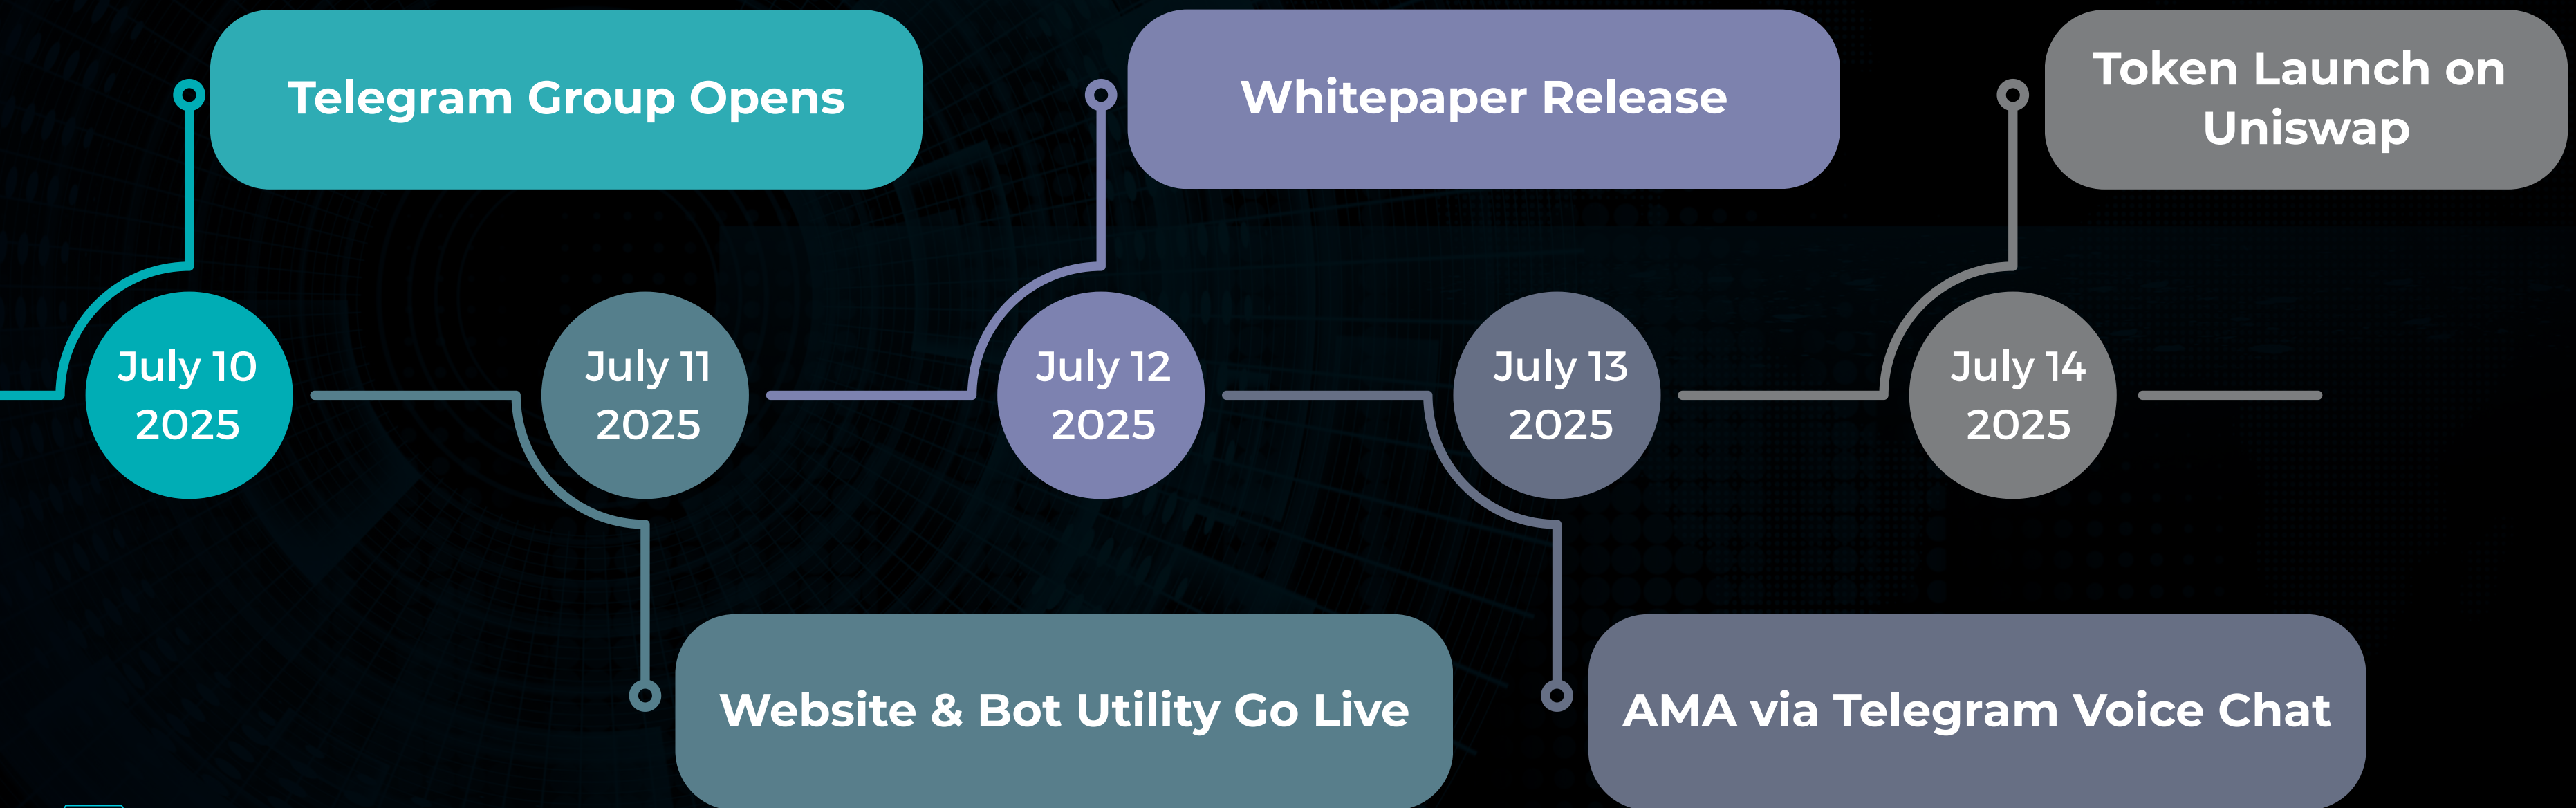

The Referral Program enables anyone to earn from community growth:

- ✓ Share your unique referral link via social media or communities.
- ✓ **Earn 0.1%** of the bridged volume for each referral.
- ✓ No cap on earnings.
- ✓ Track referrals transparently inside the bot.

This structure transforms users into brand advocates while expanding the ecosystem.

Roadmap & Timeline

Competitive Advantages

What Sets Us Apart

- ✓ **Speed:** Transactions settle faster than any Telegram-based bridge.
- ✓ **Accessibility:** Zero onboarding friction—Telegram-native experience.
- ✓ **Transparency:** Real-time referral tracking, fair tax system, and clear tokenomics.
- ✓ **Scalability:** Built to scale with more chains and user demand.
- ✓ **Community Alignment:** Revenue model reinforces token value through direct buybacks.
